
NDIA Expeditionary Warfare Conference:
Joint Seabasing Panel

Moderated by RADM Charlie Hamilton

20 October 04

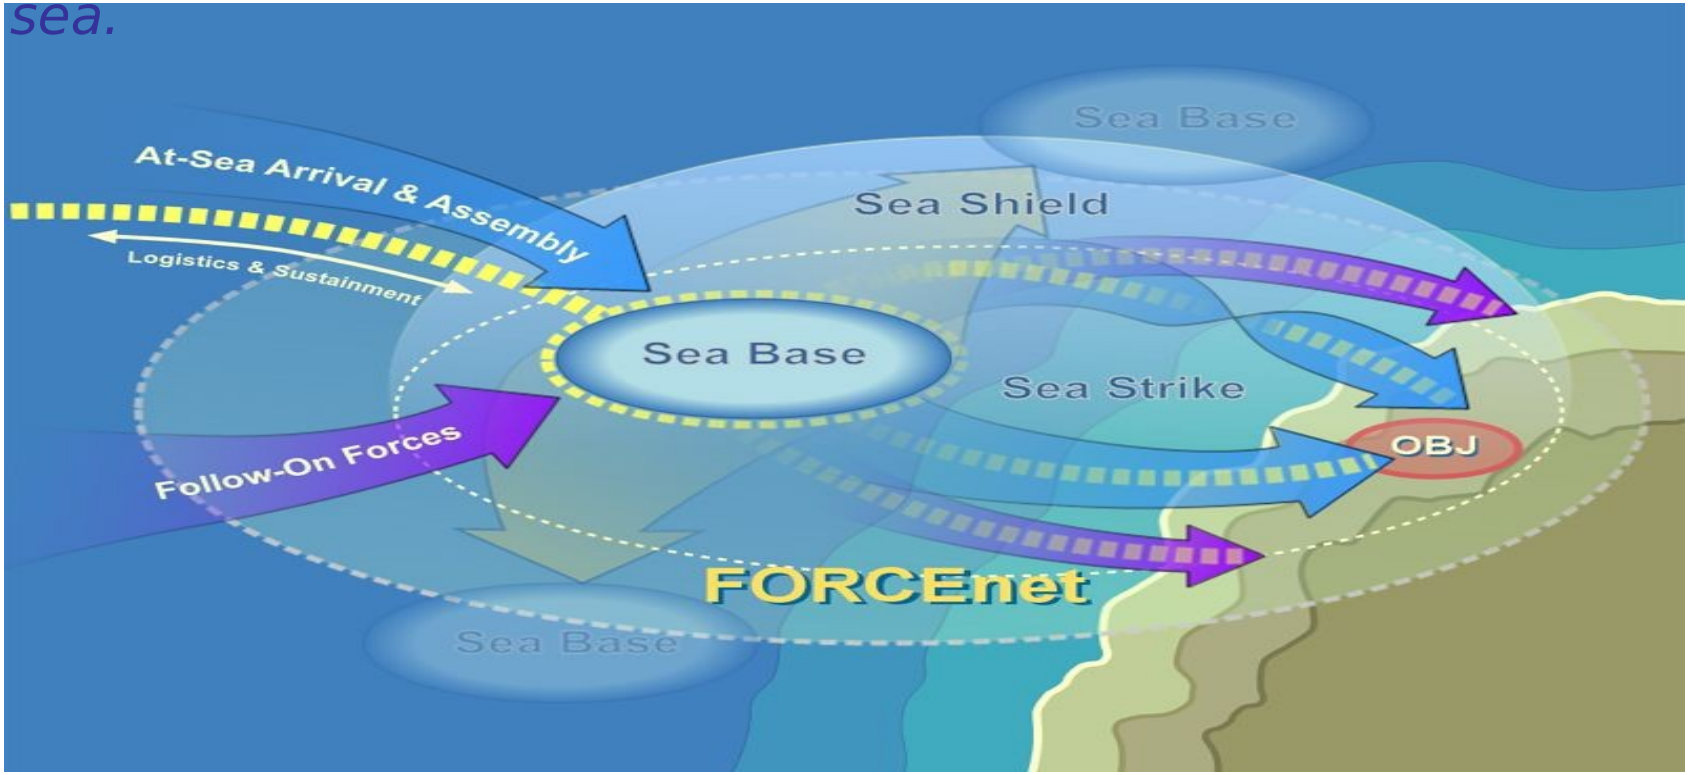
Distribution Statement A: Approved for Public Release; Distribution Unlimited. (09/01/16).
This Brief is provided for Information Only and does not constitute a commitment on behalf of the U.S. government to provide additional information and / or sale of the system

Agenda

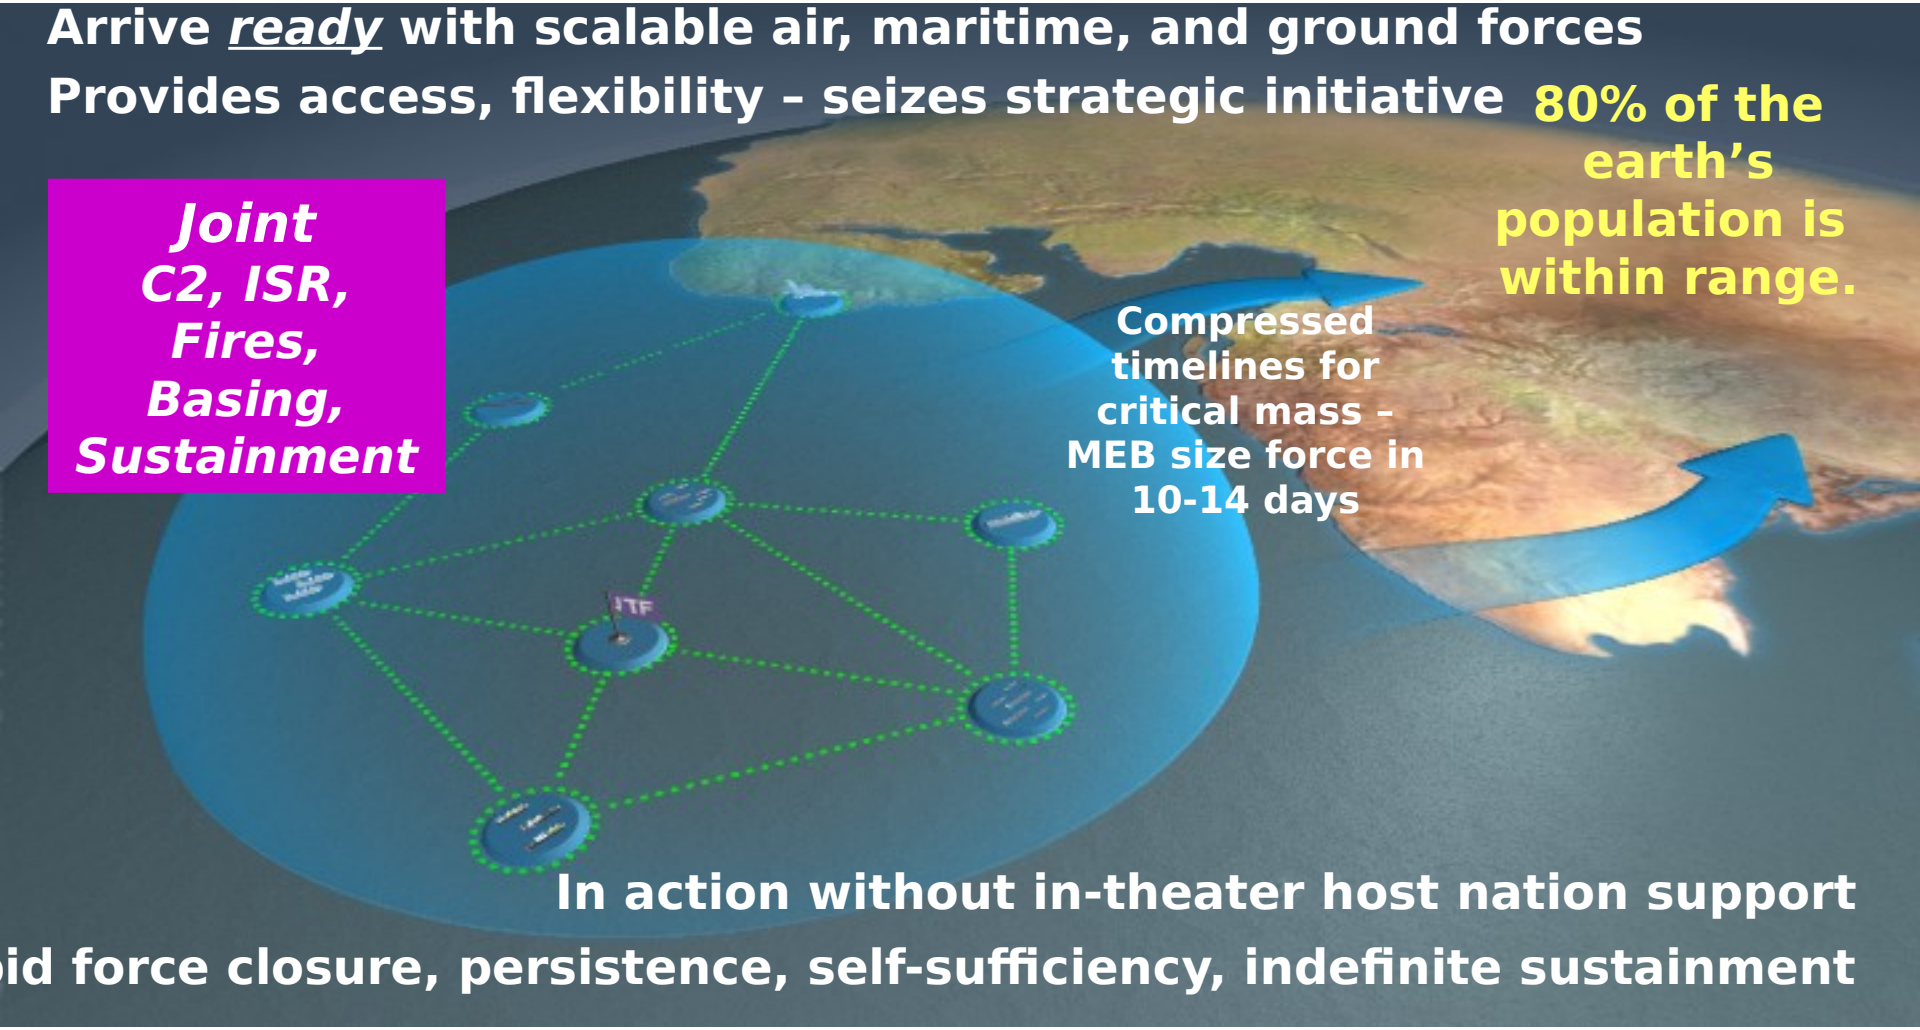
- Introduction
- Col. Jim Strock, USMC, Ret.
  - Deputy Director, Expeditionary Force Development Center
  - Marine Corps Combat Development Command
- Mr. Howard Fireman
  - Director, Future Concepts (SEA 05D)
- CAPT Rich Hooper, USN
  - Program Manager, Amphibious Warfare Program (PMS 377)
- CAPT Pat Sudol, USN
  - Program Manager, Support Ships, Boats and Craft, Sealift and Special Mission Ships (PMS 325)
- Discussion

Seabasing

***Seabasing**, a national capability, is the overarching transformational operating concept for projecting and sustaining naval power and joint forces, which assures joint access by leveraging the operational maneuver of sovereign, distributed, and networked forces operating globally from the sea.*

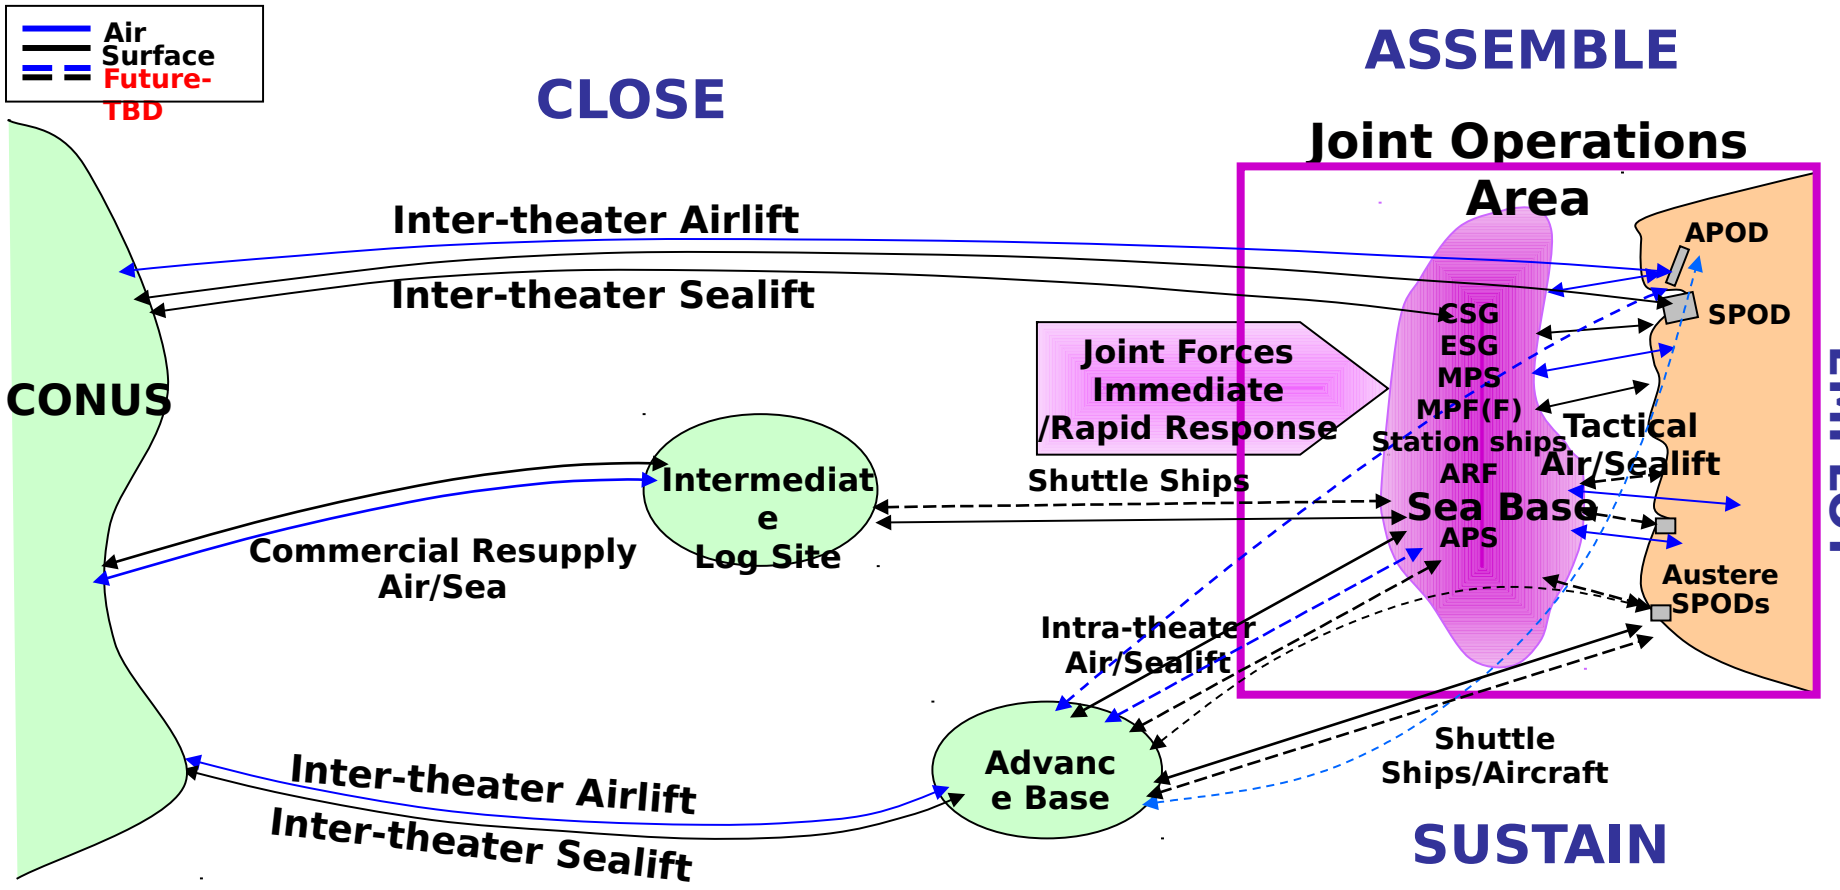


Value of Joint Seabasing



Arrive *ready* with scalable air, maritime, and ground forces
Provides access, flexibility – seizes strategic initiative
80% of the earth's population is within range.
Joint
C2, ISR,
Fires,
Basing,
Sustainment
Compressed timelines for critical mass – MEB size force in 10-14 days
JTF
In action without in-theater host nation support
id force closure, persistence, self-sufficiency, indefinite sustainment

Seabasing Overarching View



The *sea base* is an inherently maneuverable, scalable aggregation of distributed, networked platforms that enable the global power projection of offensive and defensive forces from the sea, and includes the ability to assemble, equip, project, support, and sustain those forces without reliance on land bases within the Joint Operations Area.

Not to Scale

Quotations

"We envision not only the Navy and Marine Corps operating from these Sea Bases, but the Army, Air Force and Coast Guard using them as well. Access without a permission slip is the fundamental imperative for this new joint approach."

Navy Secretary Gordon England

National Press Club

27 May 2004

Quotations

"When I look 20 years from now, I see a Sea Base where we are going to field a capability that's going to be unlike anything anybody imagined just a few years ago. We see a future where we are going to invest rapidly, as rapidly as we can, in creating the Maritime Pre-positioning Force of the future."

CNO ADM Vern Clark
